

WICKTEK INC.

Manufacturer of **DensiCrete**

CORPORATE OVERVIEW

WICKTEK INC. is a privately-held company incorporated in Pennsylvania in May, 1991. The company's headquarters is located in Farmington, Pennsylvania, which is located 65 miles southeast of Pittsburgh, Pennsylvania. The company also has offices located in Cincinnati, Ohio and Washington, DC.

WICKTEK INC. is engaged in the manufacture and sale of chemical penetrants for application to concrete and cementitious surfaces. End users of these penetrants include: transportation departments; construction firms; electric utilities; industrial manufacturing companies; water parks and warehouse facilities.

CONCRETE TREATMENT PRODUCT LINE

After extensive research and development and comprehensive testing by independent laboratories and confirmation of the test results by Pennsylvania Department of Transportation (PENNDOT) laboratories, WICKTEK INC. has begun to market a new concrete treatment product that prolongs the life of cementitious structures, as well as those made of limestone and brick.

Called **DensiCrete**, the chemical penetrates deeply into the concrete matrix to prevent carbonation and retard rebar corrosion. The treatment process also internally cleanses and densifies the concrete matrix. When **DensiCrete** is applied, the cementitious structures enjoy more durability through increased flexure and compressive strength and prevention of freeze/thaw deterioration. The chemical composition of **DensiCrete** is also non-toxic and contains no hazardous materials.
